

1. Design and Development of Complete Autonomous Vehicle (4W Passenger Vehicle) - WIRIN.
2. Development of Low-Cost Autonomous Vehicle as a Campus-Driven Vehicle.
3. Design and Development of Pneumatic Valve actuator for Colour Sorting machines.
4. Development of Wireless Power Transfer chargers for Electric Vehicles.
5. Design and Development of Self balancing Two Wheeler.
6. Retrofitting of any ICE (2W,3W and 4 W) Vehicle to an Electric Vehicle.
