

1. Gesture-Based Kinematic Robot Control Using Visual Servoing was published in the Journal of Mechanical Robotics, vol. 8, no. 3, pp. 23-28, in 2024.
2. Automated Anthropometric Measurement System for CNC Machine Workspace Design appeared in the Journal of Automation and Automobile Engineering, vol. 8, no. 3, in 2023.
3. Enhancing Machine Tool Performance Through Analysis and Implementation of an IoT-Based Energy Monitoring System was published in the Journal of Mechanical and Mechanics Engineering, vol. 10, no. 1, pp. 20-31, in 2024.
4. Topology Optimization and Generative Design for Weight Reduction in Palletizer Robots was presented at the 8th International Conference on Computational System and Information, in 2024.
5. Gesture-Based Kinematic Robot Control Using Visual Servoing was published in the Journal of Mechanical Robotics, vol. 8, no. 3, pp. 23-28, in 2024. (Repeated as per the list.)
6. Automated Anthropometric Measurement System for CNC Machine Workspace Design appeared in the Journal of Automation and Automobile Engineering, vol. 8, no. 3, in 2023. (Repeated as per the list.)
