# WORKSHOP AT EMPRI ON ENVIRONMENT AWARENESS AND SUSTAINABLE LIFESTYLE

Date: 8/11/2024

Venue: JP Nagar, Bengaluru

**Description:** The NSS RVCE team organized a "Environment and Sustainable Lifestyle" workshop in collaboration with the Environmental Management & Policy Research Institute (EMPRI) at JP Nagar, Bengaluru on this day. This event aimed to increase awareness of sustainable practices and to foster a closer connection with nature through practical learning experiences. With an impressive turnout of volunteers, the event included an enriching eco walk

#### MAHATMA GANDHI INSTITUTE OF RURAL ENERGY AND DEVELOPMENT

Date: 10/02/2025

Venue: Mahatma Gandhi Institute of Rural Energy and Development, Bengaluru

**Description:** The NSS unit of RVCE organized an educational visit to the Mahatma Gandhi Institute of Rural Energy and Development (MGIRED), Bengaluru, a premier institute promoting sustainable practices and renewable energy technologies. Volunteers attended expert-led sessions on renewable energy, rainwater harvesting, and solid waste management, gaining both theoretical insights and hands-on experience. The visit featured practical demonstrations of solar panel operations, rainwater collection and filtration systems, and waste segregation with composting and biogas generation. Volunteers also explored the Modular Village Theme Park, showcasing energy-efficient housing, sustainable agriculture, and eco-friendly waste solutions. The experience enhanced participants' understanding of sustainability, inspired practical implementation in communities and institutions, and reinforced the importance of renewable energy, water conservation, and responsible waste management for a greener future.

### SEWAGE TREATMENT PLANT VISIT, KENGERI

Date: 30/11/2024

Venue: Sewage Treatment Plant, Kengeri

**Description:** As part of the NSS initiative on environmental sustainability and water management, volunteers visited the Sewage Treatment Plant (STP) at Kengeri to gain practical insights into wastewater treatment and its importance for public health, ecological balance, and sustainable resource use. The visit covered all major stages, preliminary (screening, grit removal), primary (sedimentation), secondary (biological aeration, activated sludge), tertiary (filtration, nutrient removal), and disinfection (chlorination, UV), as well as sludge treatment, disposal, and reuse. Participants learned how STPs prevent water pollution, protect aquatic ecosystems, reduce the spread of waterborne diseases, and enable water recycling for non-potable uses. The Kengeri STP also showcased technological advancements like improved filtration systems and sustainable sludge management practices, highlighting its role in meeting environmental regulations and promoting resource conservation in urban settings.
